

ELEC 201 Group # _____ Peer Team Member Evaluation

Please write the names of all your team members, including yourself, below, and rate their Team Citizenship. Your rating should reflect each individual's level of participation and effort to the design project, and his/her sense of responsibility to the team, not his or her academic ability or other skills. The possible ratings are as follows:

Excellent	Consistently went above and beyond: many contributions, tutored teammates, carried more than his/her share of the load; enthusiastic, positive attitude, strong team player.
Very Good	Consistently did what he/she committed to, very well prepared, carried proportionate load, offered many ideas, cooperative, helpful, positive attitude, very good team player.
Satisfactory	Usually did what he/she committed to, acceptably prepared, cooperative, contributed to the team.
Ordinary	Often did what he/she committed to, minimally prepared and cooperative, some contributions to the team.
Marginal	Sometimes failed to show up or complete what he/she committed to, rarely prepared, few contributions to the effort or team.
Deficient	Often failed to show up or complete what he/she committed to, few contributions, poor cooperation and team player.
Unsatisfactory	Consistently failed to show up or complete what he/she committed to, unprepared, no contributions, negative attitude, not part of the team.
Superficial	Practically no participation in the project or team activities.
No Show	No participation at all.

In addition, evaluate the contribution of each group member to the project as a percentage (100% total); this should indicate both the quality and quantity of contributions.

Name of Team Member	Citizenship	Contribution %

Use the reverse side to add any comments you wish about your team or team members, outstanding contributions or persistent problems. Also comment, if you wish, on the performance of the labbies: strengths and weaknesses; be specific as appropriate.

You must turn in this evaluation to get a grade in the course. Return it to my office, Abercrombie Lab A206, by the end of classes, in a sealed envelope if you wish. Your responses will not be revealed to anyone else.

Thank you; have a great semester break and keep in touch! ---Jim Young.
