Please provide further explanation of any factors that influenced your response to question 9.

Dr. Loos is one of those rare breeds: a Professor who passionately cares about his students and whether or not they are mastering the material. Unlike some of the tenured folks around here at Rice, Dr. Loos gave 150%+ in his efforts to teach us.

His lectures were clear and concise. His mastery of the English language was refreshingly at a high level (not to be presumed). Thankfully, he did not take the easy way out and speed through a bunch of powerpoint.

Dr. Loos has a willingness to put a level of effort to assist students that is above and beyond the call of duty. I am very grateful for the extra time that he put into assisting my efforts to do well at Crystallography and Diff..

Additional Comments:

Maybe it would help students if you worked more problems during class, otherwise I really enjoyed the class

A very good course which supplements the theory course in X-ray diffraction
